Tamarisk Road
Improvement Project

City of Calder Springs · Public Works · Fact sheet, November 2026

Tamarisk Road Improvement Project

Starting in January 2027, the City will rebuild 2.4 miles of Tamarisk Road in three phases. The road gets a center turn lane, continuous sidewalks, bike lanes, better lighting and a bridge over the Mill Street wash.

What is being built

- **A center turn lane.** Left turns move out of traffic. Rear-end and left-turn crashes are the most common kind on this road.
- **Sidewalks on both sides.** Six feet wide and continuous, with curb ramps at every corner. Today 62 percent of the road has no sidewalk.
- **Bike lanes.** Six feet wide, separated from the sidewalk by a landscape strip.
- **Three safer crossings.** New signals at Canal Street and Fairground Drive, and a flashing-beacon crosswalk at Tamarisk Elementary.
- **A bridge at the Mill Street wash.** The road has closed for flooding nine times in five years. The bridge keeps it open in a storm.
- **Streetlights and bus stops.** LED lighting the full length, and two covered stops for Route 7.

When

Phase	Section	Dates
Phase 1	Depot Street to Canal Street	January to August 2027
Phase 2	Canal Street to Quarry Road	September 2027 to May 2028
Phase 3	Quarry Road to Fairground Drive	June 2028 to January 2029

Planned closures

When	Where	What is closed	Detour
Two weekends in February 2027, Friday 8 p.m. to Monday 5 a.m.	Depot Street intersection	The whole intersection	Harlan Avenue
Five nights in June 2027, 8 p.m. to 5 a.m.	Canal Street intersection	The whole intersection	Harlan Avenue
About 14 weeks, November 2027 to February 2028	Tamarisk Road between Mill Street and Orchard Lane	Through traffic. Local access stays open.	Harlan Avenue between Canal Street and Quarry Road
Five nights in October 2028, 8 p.m. to 5 a.m.	Fairground Drive intersection	The whole intersection	Harlan Avenue

Project facts

Length	2.4 miles
Construction	January 2027 to early 2029
Cost	$38.6 million
Traffic today	18,400 vehicles a day
